

# Business Insurance with a personal touch

## Every business is unique and so are the risks each company faces

Our team use their in-depth knowledge to help businesses identify risks, ensuring that they receive cost-effective protection as they evolve and react to market conditions.

We can arrange protection for all types of businesses, large and small. From professional indemnity and motor fleet to employers and public liability insurance.

“The whole team is friendly, knowledgeable and very helpful. They are always at the end of the phone when you need them.”

Ian Dawkins  
Hi Speed Services

Our advisers have a wide range of experience and devote considerable time and effort to helping clients understand potential areas of insurable risk within their businesses.

Insurance for mandatory requirements such as employers' liability insurance can be combined with other protection such as public liability, product liability and property insurance to ensure that your business is protected cost effectively.

# Insurance to suit every business

Our team can guide you through legislative requirements, health and safety and other business risks to give you peace of mind that everything is covered.

If your business is exposed to risks, you can be sure that Peter Lole Insurance Brokers will be with you every step of the way to efficiently manage any claims and ensure minimum disruption to your operations.

Ensuring that your business is protected is essential and we can help create a bespoke solution to cover a wide range of scenarios.

## Employers' Liability

Mandatory for all UK and EU law employers, it protects an employer's legal liability for injury or illness caused as a result of the employer's negligence.

It covers the costs of legal defence and resulting compensation following litigation.

It is vitally important to know exactly what is covered under your employers' liability insurance policy.

## Public Liability

This covers any injuries to a third party and/or damage to third party property, caused as a result of negligence.

It covers anyone who is not an employee of your business.

Our team are on hand to guide you through the process of selecting the best insurer for you.

## Product Liability

If your company designs, manufactures, sells or handles products that are sold or even given away for free, you should consider product liability insurance.

This covers the costs of compensating any person injured by a product that your business has been involved in the process of producing and/or delivering.

Your company could be held legally responsible for any injuries to people or damage to property caused by a product supplied and it is therefore extremely important that you are covered.

# Commercial Combined Insurance

A Commercial Combined Insurance package is usually a cost-effective and comprehensive way to manage a range of requirements. It is a complete business insurance policy made up of sections selected to cover your specific risk exposures.

This combined approach can be tailored according to your specific requirements.

The Combined Insurance package can include the following:

Employers' Liability  
(required by law)

Public Liability

Product Liability

Property Damage

Business Interruption  
& Consequential Loss

Cyber Liability

Personal Accident

Directors' & Officers'  
Liability

Computers  
(including virus and  
or malicious erasure)

Money and Assault

Glass

Goods In Transit

Terrorism
